

BROPHY AVIATORS CLUB
FLIGHT SIMULATOR LAB

STRAP IN.

Put on the headset and you are in the cockpit. Bank the yoke and the seat banks with you. This is as close to flying as it gets without leaving the ground.

— THE MOTION RIG

THE SEAT FOLLOWS THE AIRCRAFT

— HEADSET

Pimax Crystal Light

High-resolution VR. Look around the cockpit, out the window, over your shoulder.

— MOTION

DoF Reality motion platform

Driven by the sim, so you feel the turns, climbs and bumps.

— STEADY VIEW

Motion compensation

A gyro on the rig keeps the world still while the seat moves.

Headset on → **TURN ON VR** → Sit still 10 s → Fly
